TELESCOPIC FORK

SAIBO design and produce telescopic fork for system builders to provide quick and convenient solution. This also will help customers reduce risks and costs. Telescopic fork is widely used in shuttle, multi-case handling AGV and mini stacker cranes etc. In order to meet the requirement of logistic industry intelligence, SAIBO launch three types of telescopic forks as blow.

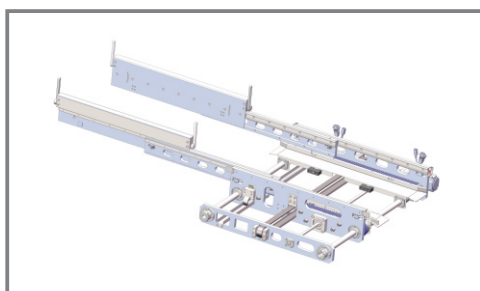

Single Deep Telescopic Fork

Property	Parameter
Load Capacity	30kg
None-load Speed (Max)	2m/s
None-load Acceleration(Max)	3m/s ²
Max Stroke	900mm
Case Width	400mm
Dimension (L*W*H)	780×563×238mm

Double Deep Telescopic Fork

Property	Parameter
Load Capacity	50kg
None-load Speed (Max)	2m/s
None-load Acceleration(Max)	3m/s ²
Max Stroke	1460 mm
Case Width	400mm
Dimension (L*W*H)	1031×937×355mm

Telescopic Clamp Fork

Property	Parameter
Load Capacity	50kg
None-load Speed (Max)	2m/s
None-load Acceleration(Max)	3m/s ²
Max Stroke	1460 mm
Case Width	200-600mm
Dimension (L*W*H)	763×1008×268mm

- Compact structure and light weight
- Strong and durable, Life tested
- Three types available
- Standard module design, short lead time
